

KFOB-C Remote Control

Your home in your hand

As manageable as a car key remote control

Manages own Z-Wave network or works as secondary controller

4 buttons can be assigned free (as single buttons or button pairs)

Controls devices directly (on/off; up/down)

Triggers complete scenes defined by smart home control center

Controls with standard and enhanced security

Smooth and robust housing

Sliding cover prevents involuntary touches of the buttons

Longer battery life due to optimized energy management

Cover closed

Cover open

Controlling your home is as simple as open your car doors! With the **POPP KFOB-C Remote Control** you can switch the lights, the heating and window blinds with only one touch of a button. Using the KFOB-C remote control is as simple as using your car key remote control – and it is equally small and compact and suits to your key ring.

Due to primary controller function you can use the KFOB-C as standalone remote control without using any smart home control center (gateway). Devices such as sockets, window blinds, dimmer, lights and electronic door locks can be switched by KFOB-C directly.

Once one device is added to KFOB-C remote control it checks the device type (switch, dimmer,...) and assigns the buttons with correct commands.

Of course you can also include the KFOB-C to an existing Z-Wave smart home network. Therewith you have the possibility to trigger predefined scenes such as the opening of the garage door with simultaneous switching on all lights in your garden by only one touch of a button. Or start the scenario “Good night” which switches off all lights and electrical devices in your house with only one touch of a button when you go to bed.

KFOB has a smooth and robust housing as well as a robust sliding cover which prevents involuntary touches of the buttons. This makes KFOB-C an indispensable part of your key ring and companion everywhere at home.

-  Heating and Climate Control
-  Security Systems
-  Lighting Control
-  Alarm Systems
-  Remote Controls
-  Control Center/ Gateway
-  Sensors
-  Device Control/ Plugs
-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you're heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 300 manufacturers worldwide.
